

National Vehicle Valuation System, Porsche South Africa

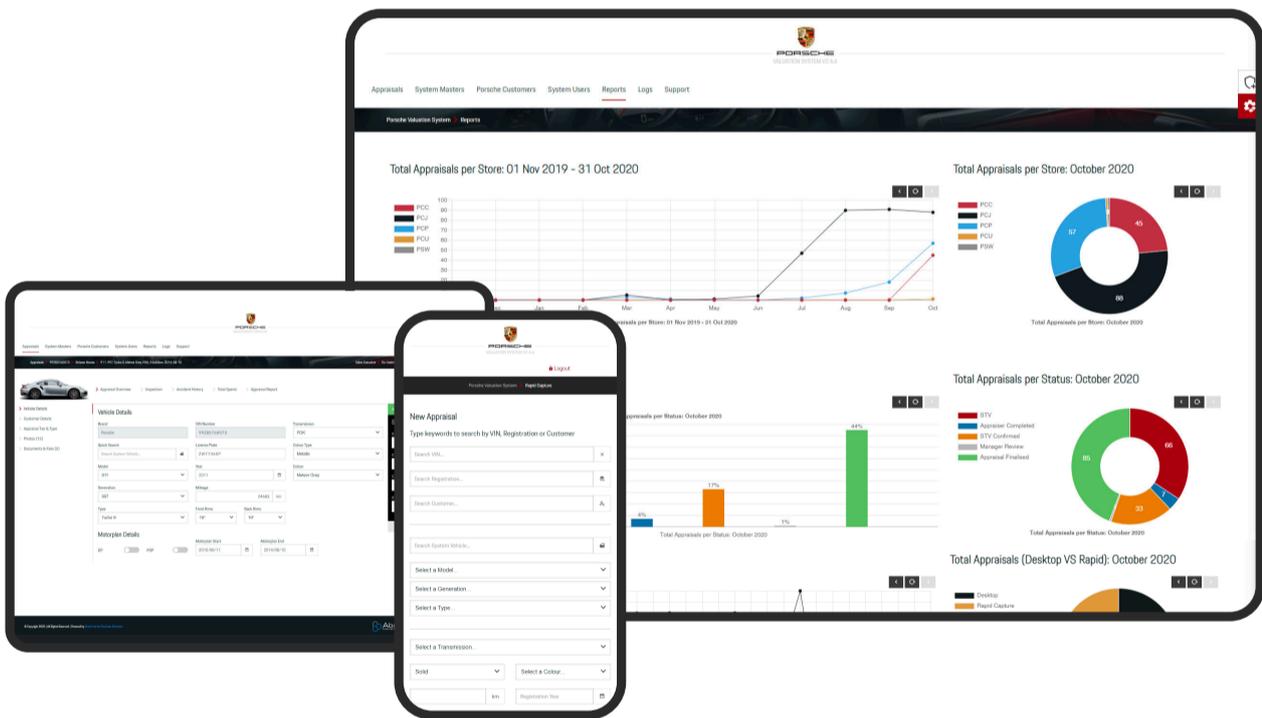

Absol Internet Business Solutions has successfully launched the newly upgraded national vehicle valuation system for the high-performance automobile manufacturer, Porsche South Africa.

Appraisals System Masters Porsche Customers System Users Reports Logs Support

The solution is a secure, web based, client-server application which provides vehicle appraisers throughout South Africa the ability to assess the value of vehicles, and review past appraisals stored in the comprehensive national database, from any location on any modern internet connected device.

Solution Overview

Porsche Valuation System V2 (PVS v2) is an all-in-one solution enabling all Porsche South Africa dealerships to perform professional, high quality and precise vehicle appraisals. PVS v2 includes advanced built-in notification processes to ensure all dealership managers are connected with their employees and kept up to date with the most recent events at their branch.

The PVS v2 solutions is a modern, secure, and highly scalable web-based solution designed and developed to enable Porsche South Africa's passionate vehicle assessors to perform their day to day tasks with ease. Designated administrators are able to manage system master data, which includes a database of authorised system users & their available system roles as well as functionality to update and maintain the official Porsche vehicle range available on the South African market today.

Detailed reporting and statistics provides Porsche South Africa a detailed overview which highlights the status of both their short term targets as well as their long term goals.
